## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhodes et al in view of French patent no.489,717 for the reasons set forth in paper no.5.

Applicant has amended the claims to include the further limitation of the edge portions being substantially perpendicular to the web portion and the outer faces of the web portions are brought into abutment against each other. Applicant states in his arguments that Rhodes does not meet this limitation because Rhodes discloses an angle with the web portion of 5-15 degrees. However, IT is the examiners contention that an angle of 5degrees is substantially perpendicular, as can be seen in figures 2,3, and 4A. Furthermore, the edges do abut one another as shown in the circled portion in figure 3. Applicant has not claimed that the entire edges abut.

### ***Response to Arguments***

Applicant's arguments have been considered but are not deemed persuasive.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
